

# Summer Research internship

BuckLuck

CV Blog

Made By:

Saprem Shah - 201401107

Urmil Bhatt - 201512028

Sheetal - 201301224

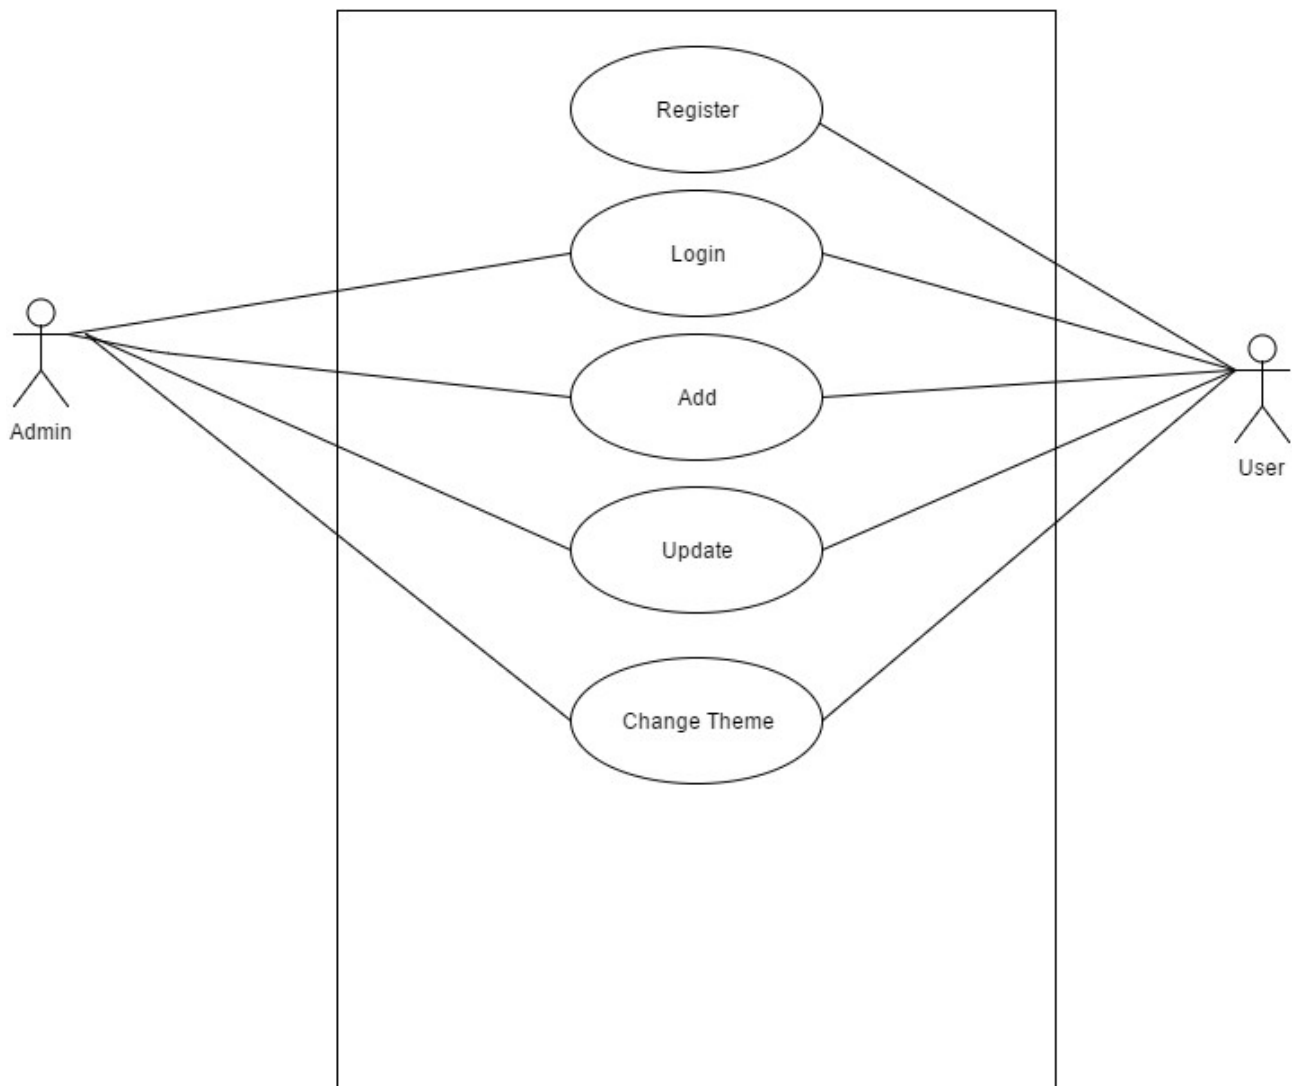

# Product Scope :

The project is aimed at enabling users all around the world, to create their personalised CV online. It enables the user to choose a new theme from the available ones for their CVBlog. It also enables user to make their profile online using this site. Only the registered users on the buckluck website have this priviledge of making personalized CV.

The user has to first login from the website to gain authorization to access this feature. After his authentication is provided and he lands on the Cvblog page, then he will be able to edit his profile in the choosen theme and get it downloaded on his personalized system in doc format.

For further extension we can use the back- end to store the users data.

## Detailed Use case :

## Programming Contribution :

As part of the team I was involved in making the front end for the Task, which involved writing the code in the HTML, CSS and JS.
